

Type overview	
Туре	DN
Type G680C	80

Technical data

E:	ın	cti	'n	nal	Ы	ata

Valve size [mm]	3" [80]
Fluid	chilled or hot water, up to 60% glycol, steam
Fluid Temp Range (water)	32338°F [0138°C]
Fluid Temp Range (steam)	32280°F [0138°C]
Body Pressure Rating	ANSI Class 125, up to 175 psi below 150°F
Flow characteristic	equal percentage
Servicing	repack/rebuild kits available
Rangeability Sv	91:1
Max Differential Pressure (Steam)	15 psi [103 kPa]
Flow Pattern	2-way
Leakage rate	ANSI Class III
Controllable flow range	stem up - open A – AB
Cv	90
Maximum Inlet Pressure (Steam)	35 psi [241 kPa]

Materials

Valve body	Cast iron - ASTM A126 Class B
Valve plug	brass
Stem	stainless steel
Stem seal	NLP EPDM (no lip packing)
Seat	Stainless steel AISI 316
Pipe connection	125 lb flanged
Non-Spring	EVB(X)
Spring	ΔF

Suitable actuators

AF
AVKB(X)

Safety notes

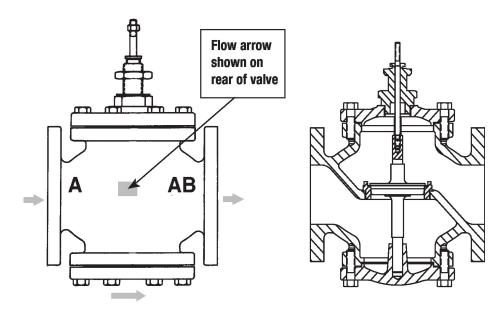

- WARNING: This product can expose you to lead which is known to the State of California to cause cancer and reproductive harm. For more information go to www.p65warnings.ca.gov
- The valve has been designed for use in stationary heating, ventilation and air-conditioning systems and must not be used outside the specified field of application, especially in aircraft or in any other airborne means of transport.
- Only authorized specialists may carry out installation. All applicable legal or institutional installation regulations must be complied during installation.
- The valve does not contain any parts that can be replaced or repaired by the user.
- When determining the flow rate characteristic of controlled devices, the recognised directives must be observed.

Electrical installation

Materials

During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.

Meets cULus requirements without the need of an electrical ground connection.

(A) Actuators with appliance cables are numbered.

1 Provide overload protection and disconnect as required.

Actuators may also be powered by DC 24 V.

Only connect common to negative (-) leg of control circuits.

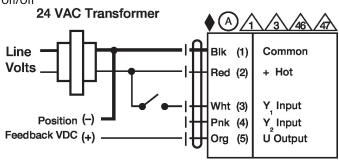

A 500 Ω resistor (ZG-R01) converts the 4...20 mA control signal to 2...10 V. Control signal may be pulsed from either the Hot (Source) or Common (Sink) 24 V line.

For triac sink the Common connection from the actuator must be connected to the Hot connection of the controller. Position feedback cannot be used with a triac sink controller; the actuator internal common reference is not compatible.

🔼 IN4004 or IN4007 diode. (IN4007 supplied, Belimo part number 40155).

Actuators may be controlled in parallel. Current draw and input impedance must be observed. Master-Slave wiring required for piggy-back applications. Feedback from Master to control input(s) of Slave(s).
