Application

1. Valves are rated at 285 psi differential pressure in the closed position @100°F media temperature.

2. Valves are furnished with lugs tapped for use with ANSI Class 125/150 flanges conforming to ANSI B16.5 Standards.

3. 2-Way assemblies are furnished assembled, calibrated and tested, ready for installation.

4. Dimension "D" allows for actuator(s) removal without the need to remove the valve from the pipe.

5. Weather shields are available, dimensional data upon request.

6. Flange gaskets (2 required, not provided with valve) MUST be used between valve and ANSI flange.

7. Flange bolts are not included with the valve. These are furnished by others.

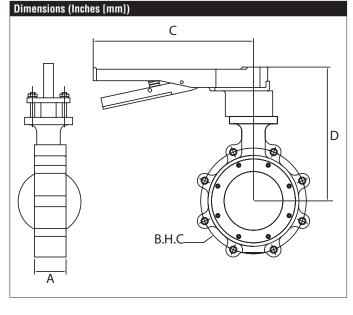

Product Features

Reinforced Teflon Seat, 316 Stainless Disc, Bubble tight shut-off to ANSI Class 150 Standards, Long stem design allows for 2" installation minimum, Valve face-to-face dimensions comply with API 609 & MSS-SP-68, Designed to be installed between ASME/ANSI B flanges.

Jobsite Note

Valve assembly should be stored in a weather protected area prior to installation. Reference the butterfly valve installation instruction for additional information.
