Application

The UGVL retrofit kit is designed to easily attach LV and SV series actuators to select globe valves. Its unique adjustable design allows the UGVL to be mounted on 1/2" to 2" two-way or three-way valves in both normally open and normally closed configurations.

Operation

The UGVL linkage with actuator will provide 20 mm of linear travel to accommodate a wide range of valves.

Default/Configuration

The default set up for a UGVL linkage will be factory installed along with a LV or SV series actuator. Included in the kit will be all the necessary hardware to facilitate mounting to the valve.
