# ZONE220N-35, 3/4", Electronic Zone Valve

| Technical Data             |  |
|----------------------------|--|
| Service                    | chilled or hot water, up to 50% glycol |
| Flow Characteristic        | on/off                                 |
| Size [mm]                  | 0.75" [20]                             |
| End Fitting                | NPT female ends                        |
| Body                       | forged brass                           |
| Body Seal                  | EPDM                                   |
| Stem                       | stainless steel                        |
| Seat                       | EPDM                                   |
| Body Pressure Rating [psi] | 300                                    |
| Media Temperature Range    | 32°F to 212°F [0°C to 100°C]           |
| (Water)                    |  |
| Close-Off Pressure         | 30 psi                                 |
| Cv                         | 3.5                                    |
| Weight                     | 1.3 lb [0.6 kg]                        |
| Leakage                    | ANSI Class III 0.1%                    |

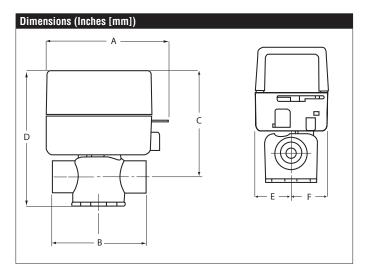

### **Application**

This valve is typically used on fan coil units, baseboards or other hydronic applications where fail safe operation on 2-wire control is required. This valve is suitable for use in a hydronic system with variable or constant flow.

This valve is designed to fit in compact areas where on/off or control is required using 24 VAC or 120 VAC.

#### **Suitable Actuators**

|             | Spring |

Wiring Diagrams

### > INSTALLATION NOTES

Meets cULus requirements without the need of an electrical ground

One built-in auxiliary switch, 1x SPST 0.4A @ 24 VAC (resistive and inductive loads).
