

## ZONE215S-25, 1/2", Electronic Zone Valve

### Technical Data

|                                 |  |
|---------------------------------|--|
| Service                         | chilled or hot water, up to 50% glycol |
| Flow Characteristic             | on/off                                 |
| Size [mm]                       | 0.5" [15]                              |
| End Fitting                     | sweat                                  |
| Body                            | forged brass                           |
| Body Seal                       | EPDM                                   |
| Stem                            | stainless steel                        |
| Seat                            | EPDM                                   |
| Body Pressure Rating [psi]      | 300                                    |
| Media Temperature Range (Water) | 32°F to 212°F [0°C to 100°C]           |
| Close-Off Pressure              | 50 psi                                 |
| Cv                              | 2.5                                    |
| Weight                          | 0.9 lb [0.4 kg]                        |
| Leakage                         | ANSI Class III 0.1%                    |

### Application

This valve is typically used on fan coil units, baseboards or other hydronic applications where fail safe operation on 2-wire control is required. This valve is suitable for use in a hydronic system with variable or constant flow.

This valve is designed to fit in compact areas where on/off or control is required using 24 VAC or 120 VAC.

### Suitable Actuators

|             | Spring |

# ZONE24NC-S

## Technical Data

|                           |  |
|---------------------------|--|
| Power Supply              | 24 VAC $\pm$ 10%, 50/60 Hz                       |
| Power Consumption Running | 6.5 W  |
| Transformer Sizing        | 7 VA (class 2 power source)                      |
| Electrical Connection     | 18" wire leads                                   |
| Angle of Rotation         | 90°  |
| Position Indication       | integrated into lever (NC only)                  |
| Manual Override           | manual lever                                     |
| Running Time (Motor)      | 20 to 40 sec                                     |
| Running Time (Fail-Safe)  | 5 sec (default), variable 2.5 to 10 sec          |
| Humidity                  | 5 to 95% RH non-condensing                       |
| Ambient Temperature Range | 32°F to 104°F [0°C to 40°C]                      |
| Storage Temperature Range | -40°F to 176°F [-40°C to 80°C]                   |
| Housing                   | NEMA type 1 / IP20                               |
| Housing Material          | UL94-5VB   |
| Agency Listings†          | CE, cULus  |
| Noise Level (Motor)       | <35 dB (A)                                       |
| Servicing                 | maintenance free                                 |
| Quality Standard          | ISO 9001   |
| Weight                    | 0.9 lb [0.4 kg]                                  |
| Auxiliary Switch          | 1 x SPST, .4A resistive (.4A inductive) @ 24 VAC |

## Dimensions (Inches[mm])

## Wiring Diagrams

### INSTALLATION NOTES

Meets cULus requirements without the need of an electrical ground connection.

One built-in auxiliary switch, 1x SPST 0.4A @ 24 VAC (resistive and inductive loads).
