

C-5226

## Pneumatic Signal Transmitter

### Description

The C-5226 Pneumatic Signal Transmitter repeats pneumatic transmission signals or selects the higher or lower of two pneumatic signal levels directly from the output of a controller. The C-5226 may also be used as a high or low signal limiter or a differential switchover device.

### Features

- operates at a 1:1 ratio to compensate for pressure drops and time lags
- accurately reproduces the output of a pneumatic transmitter

- provides additional capacity for a pneumatic transmitter with input to several T-5800 Series Receiver-Controllers

### Repair Parts

If the product fails to operate within its specifications, unit replacement is required.

### To Order

Specify code number **C-5226-3**.
