

Y71 Series

# Combination Gas Valve Regulator Conversion Kit

## Description

The Y71 conversion kits are designed for use with all Johnson Controls G93, G96, G195, G196, and VLV gas valves. These conversion kits can be used to change a regulator from natural gas to LP or from LP to natural gas operation. The Y71 kits can also be used to convert from a regulating valve to a non-regulating valve.

Each regulating Y71 conversion kit contains the following

- regulator spring (1)
- seal screw (1)
- caution label (1)

The non-regulating Y71 conversion kit contains the following:

- blank plate (1)
- gasket (1)
- self-tapping mounting screws (4)
- caution label (1)

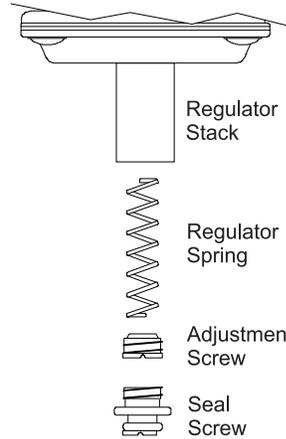

## To Order

Specify the code number from the following selection chart.

## Selection Chart

Conversion	Regulator Type	Code Number
Natural Gas to LP Gas Regulation	Lever Acting	Y71GF-4
