Strengthens immune systems, and fights bacterial aerosols!

Clears odors and contaminants from cigarette and cigar smoke!

Enhances your sense of well-being, promotes better sleep and increases mental alertness!

iAIRE, the leading outside air solutions company is pleased to bring you ultraPURE indoor air quality solutions.

The ultraPURE product line helps reduce and eliminate many household bacteria and odors including:

- Elimination of mold spores
- Elimination of smoke odor
- Reduction of pollen levels
- Reduction of animal dander
- Reduction of hay fever
- Reduction of asthma symptoms
- Reduction of common household odors

Other benefits include a reduction in radon levels as well as chemical odors from cleaning products and other materials and fabrics.

Take the first step to providing a healthier, environmentally friendly solution for even the most repulsive indoor spaces.

 **ultraPURE** has you covered!
indoor air quality solutions

Unlike many other air purifiers on the market, ultraPURE does not produce nasty ozone, making it safe to use in occupied spaces.

ultraPURE is different than UV bulbs that are fragile and costly or HEPA filters that need constant replacing and maintenance.

The purification devices used by ultraPURE have no moving parts and do not use any chemicals or filter systems.

Install it and forget it!
